# RASTAK INTRODUCTION

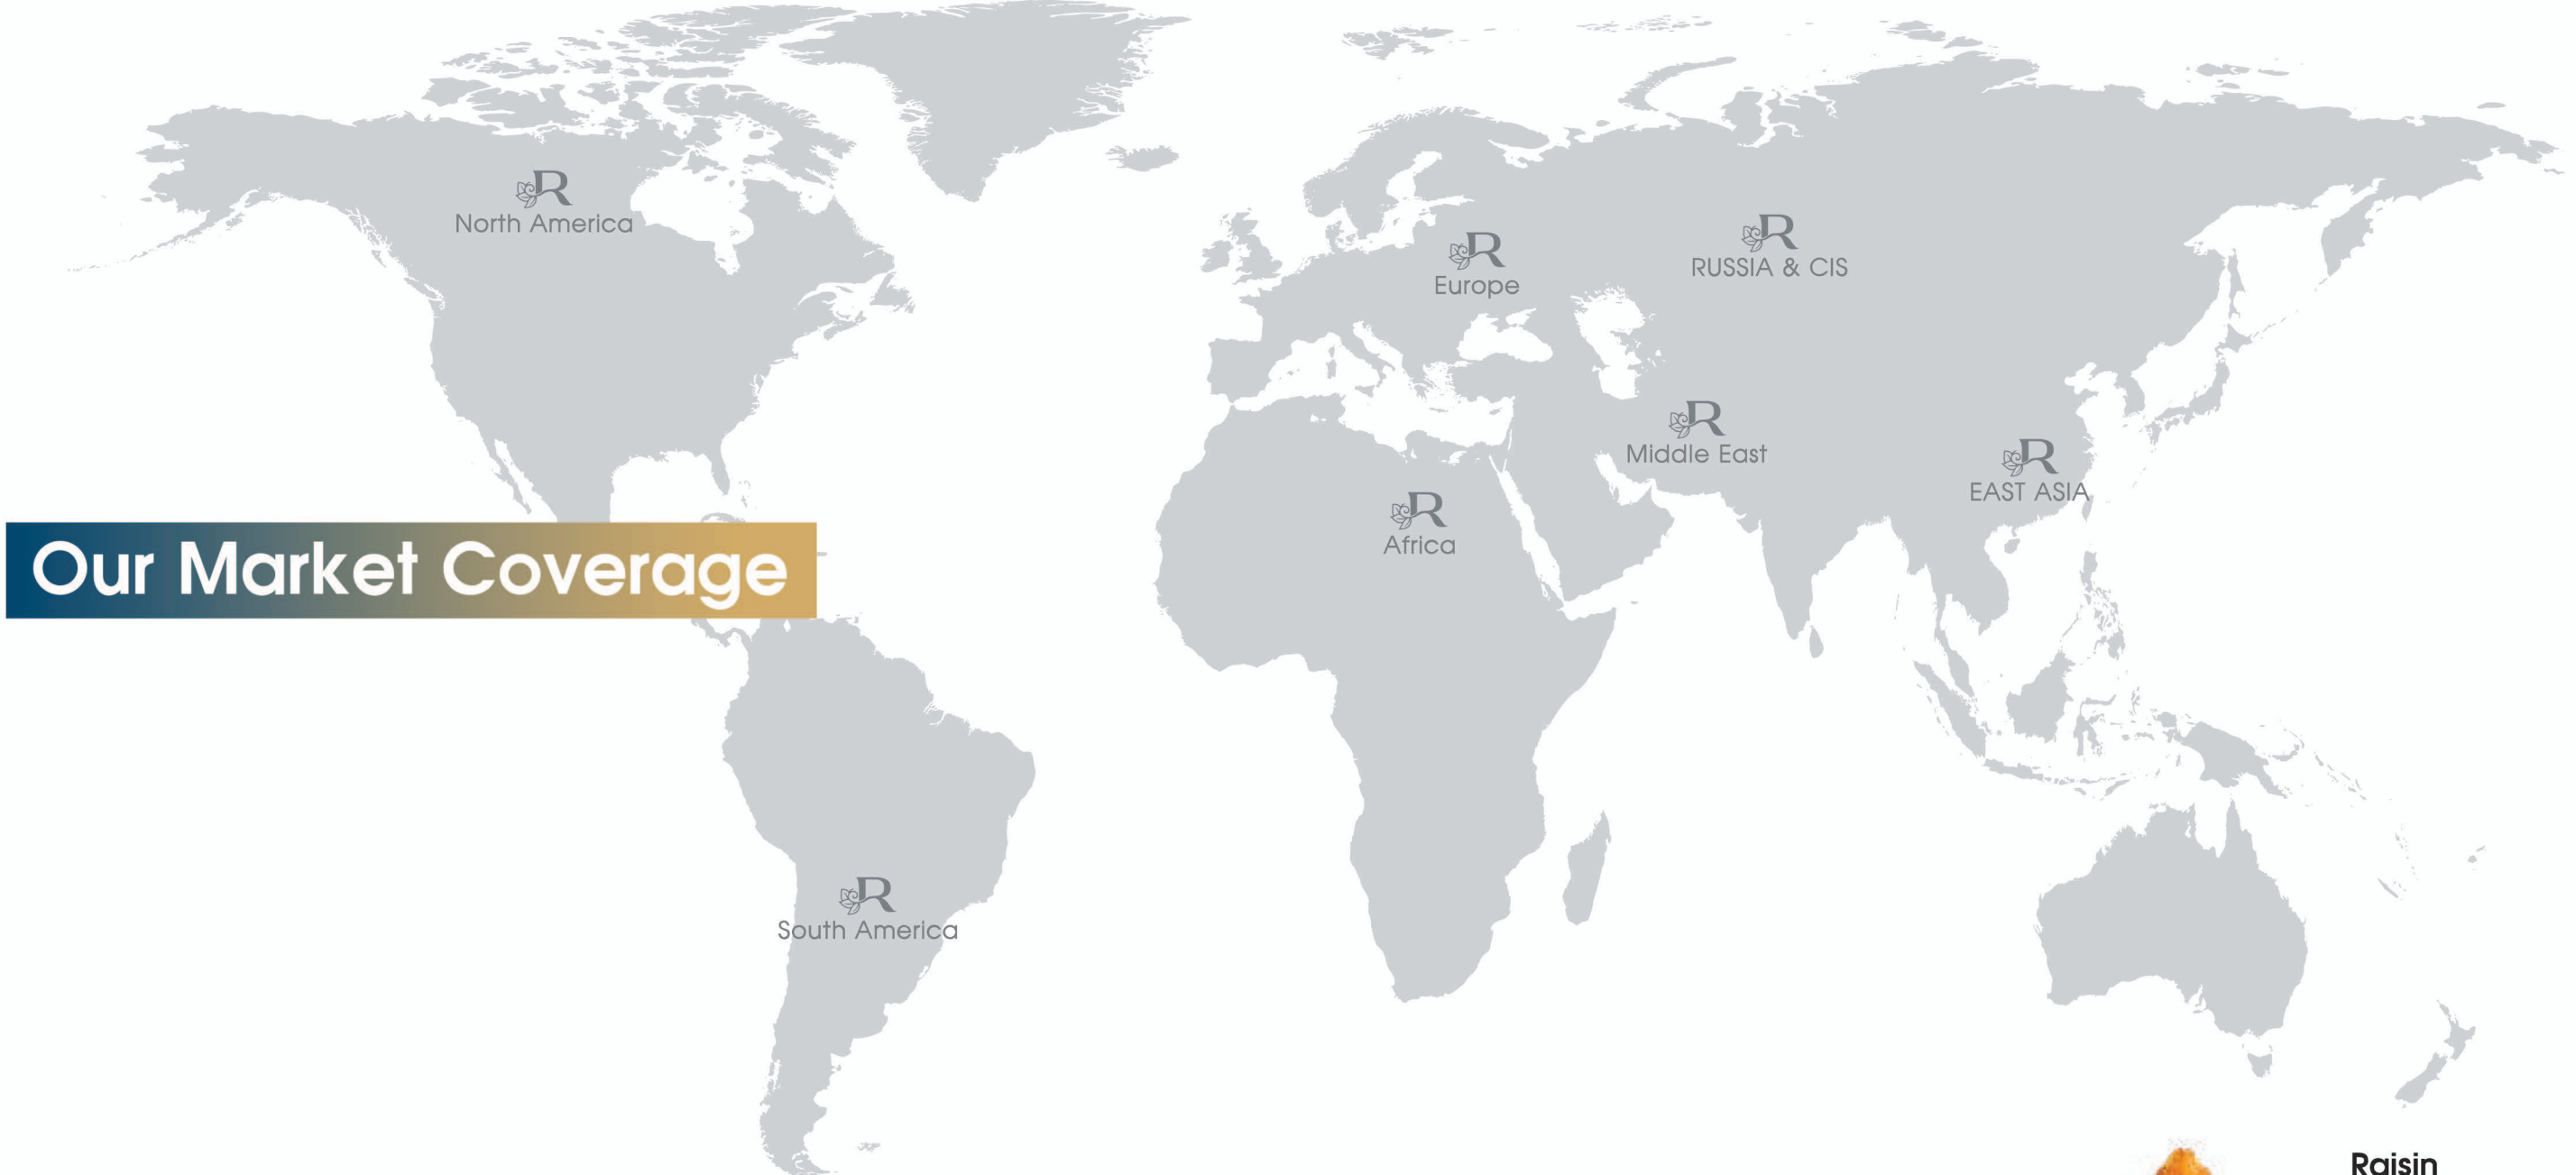

## RASTAK

### New Bud in Ancient Land

In Rastak we serve all fresh and delicious Nuts and Dried Fruits growing from Land of Persia to the world – Availability of wide range with adjusting ourselves with needs of our partners made us a Reliable Source of dried fruit and nuts in the globe market , it's our daily duty to find the best way to put smile on the face of our clients. years of experience in procurement, packaging , documentation, finance, transportation and doing all export affairs from farms until the final destination is the reason of building Rastak.

As a new bud in Ancient Land we try and doing our best to walk through all difficulties and supply the right product with tailor made services to our partners because we believe at the end of the day all businesses will become a friendship if both sides will accept win-win partnership.

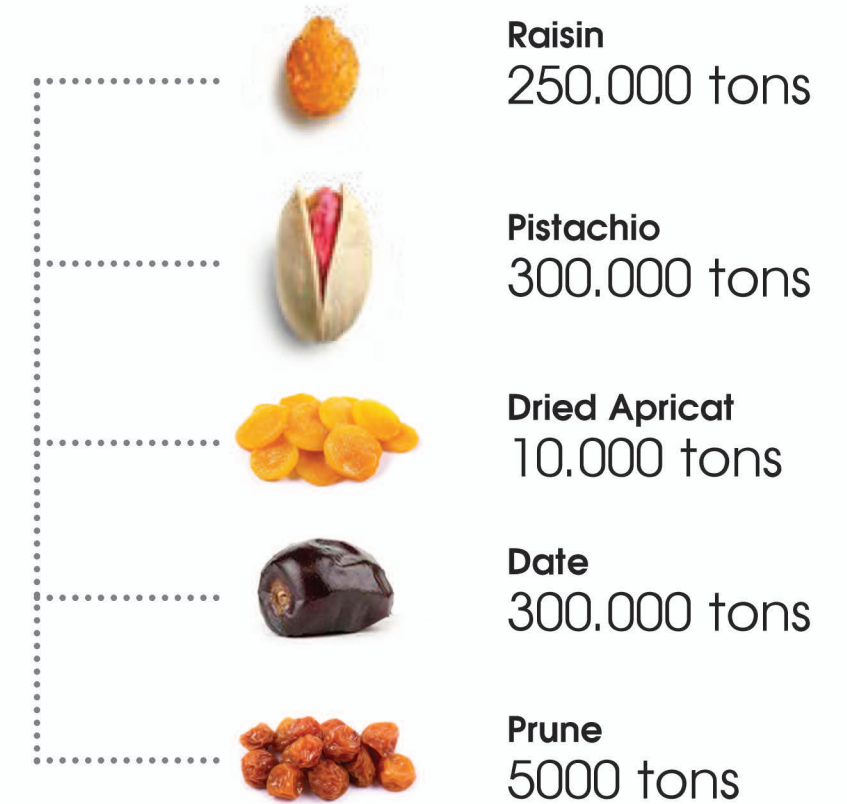

## Our Market Coverage

We are currently exporting to more than **20 countries** through our Loyal Partners and it's our honor to Shake hands of our new partners.

### Iran Annual Production

# CHARACTERISTICS

## IRANIAN RAISIN

In a Normal year, Iran can harvest & Process 200 to 250 Thousand Metric Tons of Raisins.

Sultana Raisin

The Brown and Brown Dark kind of Raisin equal to **Turkish T9** Raisin and this kind is mostly processing in North East side of Iran like Ghuchan area and beside the color, it is So2 Free , Pesticide Free and differ in size from 600 berries in 100 g up to 210 berries in 100 g , the sweetness and other mentioned aspects of this kind make it the right choice for cakes, cookies, bread, ingredients for mix dried fruit, and so on.

Malayer Raisin

Malayer is an ancient place of processing raisins since hundreds of years ago and almost all grapes growing in this region including Takestan, Abhar, Zanzan and in general center to north west of Iran is sulphurating, equal to **Turkish T10** and having lighter color than Sultana, their color is brown light with delicious taste and suitable for eating, cooking and using as ingredients of mix trails. Berry count is mostly standard and between 270 to 350 in to 100 g.

Golden Raisin

East Azerbaijan province is the heart of this product mostly from Malekan and Bonab areas, the yellowish color of this kind of raisin is the reason of naming it Golden Raisin , there are several processing methods to make yellow color raisin from grapes but all are traditional. the berry count is standard and between 300 to 350 in 100g , there are only few countries such as Uzbekistan and South Africa beside Iran almost covering 100% of global market for this product. Not specific use in domestic market and almost 100% of production is for export.

Sun-Dried Raisin

A dark brown to black kind of raisin like American **Thompson** and process completely naturally, this type of raisin is useful to produce alcohol and its preparing under direct sun light, its So2 free too and mostly uses in domestic market.

### 1. Product Description:

### 11. Storage & Shelf Life:

Below 25 °C, In dry place away from direct sunlight, Unopened: 18 months excluding Golden Raisin which is 12 months

# IRANIAN PISTACHIO

In a normal year Iranian can harvest and process **250 to 300 thousand** of pistachio with around 45 to 50 thousand metric tons of domestic market consumptions.

In case of demographic diversification, we can say the ancient regions are Kerman & Yazd provinces, and in recent years Markazi, Tehran and specially Khorasan provinces spend a lot and harvest huge tonnage of pistachios.

## In Shell Pistachio:

### Akbari

The longest type of pistachio growing in Iran and sizes: **18/20 – 20/22** and **22/24** are the most famous sizes of this kind of pistachio, Akbari has a unique taste between all other types but the shell is not as shiny as other types of pistachios. Akbari is more available each two years means that, one is lower in quantity and in next year there is higher quantity available.

### Ahmad Aghaei

The shiniest shell is belonging to this type of pistachio and sizes are including: **20/22-22/24-24/26-26/28** and **28/30**. the biggest quantity of yearly production is in Kerman province and in recent years Markazi province also became an important player in the market.

### Fandoghi

The third main type of pistachio is Fandoghi with following sizes: **26/28-28/30** and **30/32**. this kind of pistachio is smaller than other types but has a green and delicious kernel, in recent years Khorasan province became the main producer of this type.

Beside mentioned kinds of Pistachio, Iran has Kalleh Ghoochi with size of 20/22- 22/24-24/26 and Badami with the sizes of 24/26-26/28.

Iran is a big exporter of closed mouth pistachio mostly to Europe market as it is aflatoxin safe products and European factories are producing kernel and cream mostly from closed mouth pistachio.

# CHARACTERISTICS

## 1. Product Description: 100% Natural open raw & unsalted Iranian Pistachio "Pistachia vera"\*

\* A member of the cashew family Anacardiaceae, is a small tree originating from Central Asia and the Middle East.

# Other Products

## Dates

We are mostly focusing on **Mazafati** Dates with its fresh, soft, sweet and karamel-like taste as well as **Saer** Dates both **pitted** and **un-pitted**. From southeast to southwest all lands are full of palm trees and Iran is one of the biggest sources for Dates in the world. Mazafati Dates shall be keep in cold temperature and preferably transport in refrigerator condition to keep the quality of that. beside those two mentioned kinds, there are also **Piarom** and **Rabbi** can be supplied by our company.

## Dreid Apricot and Prune

Apricot & Prune processors are located in East Azerbaijan province and we are selecting the Best quality one, among all available products for our partners.

In general there are 4 sizes available in Iran including: **Jumbo** with +40mm and 50 to 55 pcs in one kg, **Size 1** between 36 to 40 mm and 75 to 80 pcs in one kg, **Size 2** between 32 to 36 mm and 105 to 115 pcs in one kg (equal to Turkish size 2) and **Size 3** between 29 to 32 mm and 180 to 195 pcs in one kg (equal to Turkish size 6) the humidity is between 20 to 30 percent.

Prune also available in same area and can be brown light to brown dark color with the sweet and sour taste.

## Kashmarai Raisin

Two kinds of raisins we have with this name: one is **Green** raisin and using for ingredient of mix dried fruit and nuts as well as eating as an individual natural sweet, another is **Golden** kashmari raisin which is longer than normal golden raisin and mostly exporting to east asian countries.

Green one has good domestic market and almost all of that is using in local market.
